Re: Rock Ridge Lake Dam, NJ File No. 25-134  
Denville Township, Morris County

Dear Mr. Murray:

**RECEIVED MAY 30 2014**

This is in reference to the 2012 Inspection Report submitted under the December 10, 2012 cover letter by Greenman-Pedersen, Inc. for the above referenced dam.

Based upon a review of the above-referenced Inspection Report, Rock Ridge Lake Dam was found by your engineer to be in POOR condition with repairs and studies necessary.

The outlined due date of June 28, 2013, in the Dam Safety Compliance Schedule has passed for the submission of the dam rehabilitation design. Therefore, the Bureau has assigned the following deadline: A dam rehabilitation design must be submitted to this Bureau by **December 31, 2014** and a complete permit application for the dam's rehabilitation must be submitted **within 6 months** of the Bureau's approval of the dam rehabilitation design. Please be aware, no further extensions will be considered.

Maintenance work such as brush and debris removal, minor concrete repairs, minor erosion repairs, gate maintenance, etc. may be undertaken without further approval. The Bureau must approve any repairs that are not considered general maintenance. Your report identifies studies and repairs that are beyond general maintenance; therefore you must retain a New Jersey licensed professional engineer to prepare the study, plans, and specifications necessary to obtain approval from the Bureau.

Please be aware that, per New Jersey Dam Safety Standards N.J.A.C. 7:20-1.11, the next regular inspection of the dam is to be performed by **October 5, 2014**.

Should you have any questions regarding this matter, please contact Sarah Hatala of this office at (609) 984-0859.

Sincerely,

John H. Moyle, P.E., Manager  
Bureau of Dam Safety & Flood Control

C: Denville Township Engineer and Clerk  
Morris County Engineer  
Valerie A. Hrabal, P.P., P.E., Greenman-Pederson, Inc.
